

frontend -- no changes needed
bootstrap and ajax .. need to change path of main bootstrap file which they have downloaded
same for jquery
for node
npm i
then
js .. file run
sample -- node index.js
same for mongo ..
but need to establish connection with database .. in mongo compass
for angular ac to my folder ..
npm install -g @angular/cli
ng serve
: no extras .. as everything is predownloaded in it
but its size is 500mb
so avoid it .
no cmds for
frontend..ajax..jquery .. bootstrap
just check path
for angular ac to my folder .
npm i
npm install -g @angular/cli
ng serve
